PORCELANATO

El porcelanato italiano está fabricado a partir de una combinación de cuarzos, arcillas y otros materiales de alta calidad, que se moldean, se prensan, se someten a un proceso de secado y se tratan a una temperatura de más de 1.300 grados centígrados.

El resultado es una pieza compacta y vitrificada. De este modo, el porcelanato ofrece beneficios que no pueden encontrarse en la cerámica tradicional.

El porcelanato tiene una resistencia y durabilidad excepcional; casi tres veces superior a la cerámica frente a la acción química, el rayado y el desgaste en general. Las superficies pueden soportar el paso de tiempo y mantener su belleza original por muchos años.

CARACTERÍSTICAS

- Gran resistencia al desgaste, manchas e impactos.

CHESTERFIELD

SOFÁS

El sofá Chesterfield original fue encargado por Lord Phillip Stanhope, cuarto conde de Chesterfield, lo que explica de dónde proviene el nombre.

Lord Stanhope quería un sofá con intrincados botones profundos y un asiento bajo, tapizado en piel genuina que permitiera a los caballeros sentarse cómodamente.

Erguidos y sin arrugar la ropa. Después de que Lord Stanhope pidiera que se encargara el primer sofá Chesterfield, nació el diseño icónico, con su respaldo igualmente alto y brazos enrollados, tapicería de piel plisada y presencia sofisticada.

Se dice que Lord Stanhope fue un creador de tendencias durante su época, por lo que no pasó mucho tiempo antes de que el diseño original del sofá Chesterfield se pusiera de moda.

A lo largo de los años, los sofás chesterfield han adornado los palacios de la realeza, destacadas oficinas de negocios, hoteles, restaurantes, clubes y casas privadas de lujo.

El Chesterfield es sinónimo de elegancia y de clase en interiores de todo el mundo, en todos los estilos arquitectónicos y de decoración. Independientemente de lo que representa para muchos, el chesterfield permanece firmemente como el sofá que encarna la mezcla perfecta de comodidad y sofisticación.
